

## **Industrial Hygiene Services**

### INDUSTRIAL HYGIENE COMPLIANCE MONITORING

Conducted a comprehensive IH survey for a fiberglass components manufacturer. Sampling included air sampling for organic vapors and dusts, as well as noise sampling. Upon completion of sampling, a comprehensive report comparing sampling results to permissible levels was provided and recommendations for enhancement of the client's overall IH program were provided. The bargaining unit's industrial hygienist strictly observed the sampling process and no discrepancies in procedures or reporting were identified.
